

A3 (8P chassis) DSG 2.0 Turbo Exhaust White Paper

The STaSIS A3 DSG Exhaust System replaces the OEM muffler and exhaust system assembly located behind catalytic converter to the rear of the car. The system was designed to specifically fit the following model of car-

Model	A3
Engine	2.0 TFSI
Transmission	DSG
Drive Train	Front Trak
Appl. Years	2005-2008

- The STaSIS exhaust system is a direct bolt-in replacement, no welding or fabrication is required. All pipes on the STaSIS exhaust system are made of T-304 Stainless Steel and precisely shaped with a CNC mandrel bender to insure an easy and direct bolt-in replacement. The exhaust is mounted with the existing OEM exhaust hangers by utilizing the stock slip joint connection at the downpipe and flange connections at the mufflers. All required hardware is included.
- The two muffler setup used on the OEM system is replaced with a mid-pipe / single muffler design.
- STaSIS muffler incorporates passive technologies to optimize sound and performance. The oval muffler chamber has been extensively developed and tested to achieve the desired overall exhaust tone while minimizing exhaust back pressure to the engine. The STaSIS muffler design gives an exhaust note that is noticeably deeper and stronger at all throttle applications while maintaining a tone that is not intrusive or “droning” at normal everyday driving speeds.
- The tail pipes use 2 x 76mm (3 in) dual wall bevel cut tips, oriented in a staggered arrangement to match the contour of the body.
- Exhaust back pressure was minimized over the stock application. This allows the turbo to spool more freely which decreases turbo lag time and increases engine horsepower. Reprogramming of the ECU in conjunction with the exhaust installation will give a bigger increase in horsepower over the stock exhaust due to the better flow characteristics.

- Testing was performed at our facility here at Infineon Raceway, surrounding country roads in Sonoma, and the city streets of San Francisco. Stainless Steel components are designed and proven to perform in corrosive environments (salted roads and ocean-side communities).

Performance and Specification Comparison Chart

	OEM Audi A3 2.0 TFSI	STaSiS
Peak Horsepower	200	215
Peak Horsepower w GIAC Chip	223	238
Pipe Diameter- Mid-Pipe to Muffler	60 mm (2.36")	63.5 mm (2.5")
Complete Assembly Weight	20 kg (44 lbs)	13 kg (28 lbs)
